$\text{CF}_2\text{Cl}_2$  (CFC-12),  $\text{C}_2\text{F}_3\text{Cl}_3$  (CFC-113),  $\text{C}_2\text{F}_4\text{Cl}_2$  (CFC-114)

Fully halogenated alkanes are anthropogenic and act as a source of  $\text{C10}_x$ , which plays a vital role in ozone photochemistry, especially in the 30-50 km altitude region.

(ii) Partially halogenated alkanes, e.g.  $\text{CH}_3\text{Cl}$ ,  $\text{CHF}_2\text{Cl}$  (CFC-22),  $\text{CH}_3\text{CCl}_3$ ,  $\text{CHFC1}_2$  (CFC-21)

The sources of  $\text{CH}_3\text{Cl}$  are natural, whereas the other partially halogenated alkanes mentioned above are anthropogenic in origin. These gases also act as a source of stratospheric  $\text{C10}_x$ .

(d) Bromine substances

Fully halogenated alkanes, e.g.  $\text{CF}_3\text{Br}$

These gases are anthropogenic and act as a source of  $\text{BrO}_x$ , which behaves in a manner similar to  $\text{C10}_x$ .

(e) Hydrogen substances

(i) Hydrogen ( $\text{H}_2$ )

Hydrogen, the source of which is natural and anthropogenic, plays a minor role in stratospheric photochemistry.

(ii) Water ( $\text{H}_2\text{O}$ )

Water, the source of which is natural, plays a vital role in both tropospheric and Stratospheric photochemistry. Local sources of water vapour in the stratosphere include the oxidation of methane and, to a lesser extent, of hydrogen.

## Annex II

### INFORMATION EXCHANGE

1. The Parties to the Convention recognize that the collection and sharing of information is an important means of implementing the objectives of this Convention and of assuring that any actions that may be taken are appropriate and equitable. Therefore, Parties shall exchange scientific, technical, socio-economic, business, commercial and legal information.
2. The Parties to the Convention, in deciding what information is to be collected and exchanged, should take into account the usefulness of the information and the costs of obtaining it. The Parties further recognize that co-operation under this annex has to be consistent with national laws, regulations and practices
